Projects

- **1. Build-Your-Own Concert VR Experience**

Computer Programming for Engineers — Final Project

Developed an interactive virtual reality environment where users can experience their own concert. Implemented custom 3D scenes, user-controlled stage elements, and immersive interactions.

GitHub: <https://github.com/kzeina/Build-A-Concert>

- **2. Interactive Photobooth Experience (p5.js)**

Intro to Interactive Media — Midterm Project

Created a photobooth-style web experience using p5.js. Designed with filters, timed captures, and playful frames inspired by cameras.

GitHub: <https://github.com/kzeina/Photobooth>

- **3. Baqala Data Collection Project**

Inclusive Data Literacy: – Collaboration with Abu Dhabi Chamber of Commerce

Conducted field research and collected survey data on neighborhood grocery stores (baqalas) across Abu Dhabi. Analyzed community accessibility, store characteristics, and consumer patterns to inform local economic insights.
